## DENSARMOR PLUS® ABUSE-RESISTANT INTERIOR PANEL

DensArmor Plus Abuse-Resistant Interior Panel is designed to replace traditional paper-faced panels in the interior of commercial buildings. As an abuse-resistant fiberglass mat panel, it provides ideal mold and moisture resistance in heavy-traffic areas like school, hospital, and public facility corridors.

Instead of traditional paper facings, fiberglass mats cover the faces of the panel's dense gypsum core, which is itself formulated to resist moisture. DensArmor Plus Abuse-Resistant Interior Panels far exceeds traditional drywall's ability to withstand abuse from scrapes, abrasions, indentation, and gouging.

### SPECS/SUBMITTALS

[3-Part Guide Spec: Section 09 29 00 Abuse-resistant and Impact-Resistant, Glass-mat Faced, Moisture-resistant Gypsum Board \(MSWord: 52KB/6pgs\)](#)
