

DENSARMOR PLUS® IMPACT-RESISTANT INTERIOR PANEL

Please reference our important [safety information](#) regarding standards and testing relating to moisture and mold resistance.

The first of its kind, DensArmor Plus Impact-Resistant Interior Panel is specially designed to replace traditional paper-faced panels in the interior of commercial buildings. In addition to being mold and moisture resistant, there is an extra layer of fiberglass mesh embedded into the panels. The DensArmor Plus Impact-Resistant Interior Panel can withstand the impact in areas with extremely heavy traffic, such as those in the passages of schools, hospitals, and correctional institutions—even in cases where the abuse is intentional.
