

TOUGHROCK® FIREGUARD® AND FIREGUARD C® GYPSUM BOARDS

Noncombustible (as described and tested in accordance with ASTM E 136), dimensionally stable gypsum cores, reinforced with inorganic glass fibers, increasing both strength and resistance to heat. ToughRock Fireguard's reinforced core helps protect framing members to prevent or delay the spread of fire, and joints will resist passage of smoke when covered in ToughRock Fireguard board.

- For use in building construction. Designed for direct mechanical attachment to metal or wood framing.
- For use in building assemblies with a designated fire-resistive rating.
- Surfacing on both faces and on log edges made from 100% recycled paper.
- Front face paper is white, back face is gray. Square cut ends.
- Meets the criteria for Type X special fire resistance, as defined in ASTM C 36.
- Classified for fire resistance by Underwriters Laboratories.

SPECS/SUBMITTALS

The paper on the front face (side to be finished) is ivory white; opposing side is grey. All paper used on faces and edges is made from 100% recycled material. Drywall has tapered long edges and square-cut ends.

Products have received both GREENGUARD Indoor Air Quality® and GREENGUARD Children & Schools certifications. Certified low levels of VOC emissions (volatile organic compounds).
