

PERMABASE® CEMENT BOARD

DESCRIPTION

PermaBase® BRAND Cement Board is designed to provide superior durability and hardness in a surface that can keep its integrity after extended moisture exposure. A stiff substrate, PermaBase® is made from Portland cement, aggregate, and a glass mesh to provide exceptional strength and longevity.

BASIC USES

PermaBase is an ideal underlayment or backing surface for applications in shower/tub surroundings, flooring, countertops and many other exterior or interior projects.

ADVANTAGES

- [30-Year Limited Warranty on PermaBase Interior Applications.](#)
- [10-Year Limited Warranty on PermaBase Exterior Applications.](#)
- Minimal crumbling or spinout due to the reinforced edge with EdgeTech technology, allowing for fastener application of nails or screws closer to the edge.
- IRC and IBC 2006 Compliant - Meets ASTM C 1325.
- Mold-resistant: Best possible score of 10, per ASTM D 3273.
- Unique core composition permits quick and easy cuts by utility knife or straightedge, requiring little to no cleaning after each cut.
- Impact resistance due to its dimensional stability and superior durability. Exceptional tensile, compressive, and flexural strength qualities.
- Superior moisture resistance insures the board will not disintegrate, rot, or smell.
- (1/2" PermaBase) Suited for use in 1 hour and 2 hour rated assemblies and is UL Classified.
- PermaBase features a smoother finish than competing brands and has no open edges, eliminating hand irritation/chafing. chaffing
- Lowest water absorption of any cement board per ASTM C 473.
- Suited for exterior and interior applications.
