## **BEADEX® GOLD MULTI-PURPOSE JOINT COMPOUND, READY-MIXED** USED FOR FINISHING GYPSUM DRYWALL INTERIORS.

PROUDLY OFFERED BY YOUR LOCAL [KNEZ BUILDING MATERIALS SUPPLIER](#).

### **PRODUCT FEATURES**

BEADEX Gold Multi-Purpose Joint Compound, Ready-Mixed is designed to finish gypsum drywall interiors. It can be used in taping, topping, concealing bead and trim, or simple hand-applied texturing.

The compound is extremely easy to use, has excellent crack-resistance, and superior adhesive properties, maintaining a tight bond even in humid job conditions. It has an extended working time which allows for working back, even in fast-drying conditions. This offers a longer setting wet-edge which prevents the tearing and rolling of previously laid compound. It is engineered to be a low-shrinkage, minimally-cratering compound, resulting in minimal labor and long-lasting finished product.

The compound provides a wide assortment of formulations to fit numerous interior finishing needs.
