## **BEADEX® LITE ALL PURPOSE JOINT COMPOUND, READY-MIXED**

A LIGHTWEIGHT, SMOOTH-APPLYING, READY-MIXED JOINT COMPOUND FINISHING FORMULATED FOR EASY HANDLING AND FINISHING.

PROUDLY OFFERED BY YOUR LOCAL [KNEZ BUILDING MATERIALS SUPPLIER](#).

### **PRODUCT FEATURES**

Knez Inc. is pleased to carry BEADEX® Lite All Purpose Ready-Mixed Joint Compound. This product bonds like a taping product, providing a tough, tight bond under most job conditions. It combines all-purpose, single-package convenience with optimum taping and topping performance. Use it for embedding and finishing, even for simple hand-applied texturing. When used as texture finishing, it should be over-painted when dry (not washable unpainted).

BEADEX® Lite formulations of joint compounds weigh up to 35% less than conventional compounds making simpler, easier, and quicker to handle and apply. This keeps productivity high and in-place costs are low. BEADEX Lite All-Purpose also keeps costs low by requiring only two coats over metal, such as corner beads and fastener (compared to the conventional three coats). Additionally, sanding is made easier by requiring only 150-grit sandpaper or 220-grit abrasive mesh cloth.
