

BEADEX® LITE TOPPING JOINT COMPOUND, READY-MIXED

A LIGHTWEIGHT, SMOOTH, JOINT FINISHING COMPOUND FOR USE IN SECOND AND THIRD FINISHING COATS.

PROUDLY OFFERED BY YOUR LOCAL [KNEZ BUILDING MATERIALS SUPPLIER](#).

PRODUCT FEATURES

BEADEX Lite Topping Joint Compound, Ready-Mixed, is formulated to fill, level, and finish coats in interior gypsum panel construction. It is recommended to use in conjunction with BEADEX® Lite Taping and Lite All-Purpose Compounds, Ready-Mixed for application of second and third finishing coats. It sands easier and faster than conventional-weight compounds and weighs up to 35-percent less. The compound has a formulation that offers superior slip and bond, and excellent crack resistance. It may be used directly from the container and needs minimal mixing, thinning, and retempering.

The compound is not recommended for embedding tape, skim coating, or texturing. It meets ASTM C475. This product is fire rated.
