

BEADEx® SILVER SET™ LIGHTWEIGHT SETTING-TYPE JOINT COMPOUNDS

PROUDLY OFFERED BY YOUR LOCAL [KNEZ BUILDING MATERIALS SUPPLIER](#).

PRODUCT FEATURES

BEADEx Silver Set lightweight setting-type joint compounds are chemically-setting compounds designed for one-day drywall finishing of interior gypsum panels and exterior gypsum ceiling boards. They permit next-day decoration of drywall interiors and are ideal for heavy fills and virtually unaffected by humidity. They mix easily with water and weigh up to 28-percent less than standard setting-type joint compounds.

The compounds are easily sanded offering a smooth, fast finish. They offer low shrinkage and excellent bond. The compounds are ideal for laminating gypsum panels to gypsum panels, sound-deadening boards, and above-grade concrete surfaces. They can also be used for filling, smoothing, and finishing interior concrete ceilings and above-grade concrete; taping and finishing gypsum panels; and finishing joints in exterior gypsum ceiling boards. They are extremely humidity-resistant, facilitating easy application in wet weather. They are suited for smoothing and patching concrete or drywall surfaces in interior projects. They are available in a several formulations with varying setting times to for differing project needs: Silver Set 5 ,8-12 minutes; Silver Set 20, 20-30 minutes; Silver Set 40, 30-80 minutes; and Silver Set 90, 85-130 minutes.

This product is fire rated and humidity resistant. The compounds meets ASTM C475.
