

BEADEx® TAPING JOINT COMPOUND

A DURABLE, HIGH-PERFORMANCE JOINT COMPOUND FOR EMBEDDING PAPER TAPE.

Proudly sold at your local [Knez Building Materials Supplier](#).

PRODUCT FEATURES:

BEADEx Taping Joint Compound is a specially-engineered, strong, ready-mixed, joint compound to be used for embedding paper tape, patching plaster cracks, or laminating gypsum panels. When your job requires crack-resistance and a high-performing bond, Beadex Taping Joint Compound is exactly what you need.

It applies quickly, offers easy workability, low shrinkage, and superior slip and bond. The compound may be used directly from the container and needs minimal thinning, mixing, and retempering. It is not suitable for embedding tape or for use as a first coat over metal corner trim and fastener.

The compound meets ASTM C475. This product is fire rated.
