## SHEETROCK® BRAND JOINT TAPE

PROUDLY OFFERED BY YOUR LOCAL [KNEZ BUILDING MATERIALS SUPPLIER](#).

### FEATURES

Knez Inc. is pleased to carry SHEETROCK® Brand Joint Tapes, a collection of extremely strong, crack-resistant, reinforcing paper tapes designed to smoothly conceal flat joints and the inside corners of gypsum drywall interiors.

The SHEETROCK® line of joint tapes consists of Drywall Joint Tape and Heavy Joint Tape. They are both exceptionally strong, cross-fibered tapes intended to be used with U.S. Gypsum Joint Compounds to reinforce joints and corners in interior drywall construction. They are also designed for joint treatments in veneer finish systems that are in rapid drying conditions and where framing spacing is greater than 16" (406 mm).

The tapes are lightly sanded for an enhanced bond and are also designed with a positive crease to make corner application simpler. They are formulated with superior tensile strength with results in strong, reliable wall joints. The tapes resist to stretching, cracks, wrinkles, and tears by tools while on the job.

SHEETROCK Joint Heavy Tape meets ASTM C475. These products are fire rated.
