

Prest-On® Drywall Fasteners

Proudly sold at your local [Knez Building Materials supplier](#).

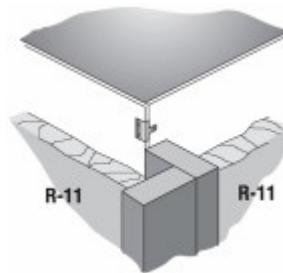

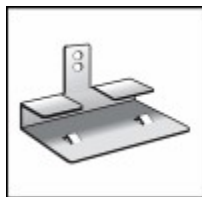

Insta-back Fastener

Available from your Knez Inc. retailer, Prest-On® Insta-back fasteners are a fast, easy, and economical tool in drywall repair. Using these fasteners, cutouts can be reattached without cutting drywall all the way back to the nearest stud. Insta-backs result in “bump free” finished butt joints and are save both time and money by reducing how many need to be finished. This product meets all the relevant fire ratings and building codes. <http://www.sheetrockpromotions.com/>

Corner-back Fastener

Knez Inc. is pleased to carry Prest-On® Corner-back fasteners, essential elements in framing and drywall installation for both cost and time efficiency. Using Corner-backs allows you to eliminate a stud at almost every corner. By eliminating the need for corner back-up studs, Corner-backs allow for corners to be entirely insulated (as illustrated below). This significantly reduces thermal loss, as well as costly callbacks due to partition/ceiling separation caused by truss uplift. This products meets all relevant fire ratings and building codes.

Corner-backs eliminate wood backup at corners and ceilings. This vastly improves framing and drywall installation speed and efficiency.
