

**Trim-Tex® 350 Bull 3 Way, 350 Bull Off Angle, 350 Miter, 350 Bull Splicer**  
Proudly sold at your local [Knez Building Materials supplier](#).

**350 Bull 3 Way Outside**

Use this product to finish three intersecting 350 Bull Corners at orthogonal angles. Simply apply a small amount of construction adhesive on the tabs to bond the 350 Bull 3 Way corner to the 350 Bull Corner Beads.

**350 Bull Off Angle 3 Way Outside**

Use this for finishing two 350 Bull Corners and one 350 Bull Splayed Outside Corner that intersect at a 135° outside off angle corner. Simply apply a small amount of construction adhesive on the tabs to bond the 350 Bull Off Angle 3 Way corner to the 350 Bull & Splayed Bull Corner Beads.

**350 Miter Marker**

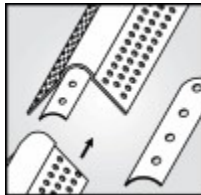

Designed to create perfect inside corners. This is a high quality tool which is suited for miter marking of 90° and 135° off angle inside corners. It can also make alignment marks that eliminate the guesswork when finishing window and door openings.

---

### **350 Bull Splicer**

Join 2 sections of 350 Bull Corner Bead with the Bull Splicer. It has a unique spring action that allows the Splicer to be snapped right into the bead for perfectly aligned trim. Apply adhesive (like Miracle DSA-20 or Liquid Nail) to the inside of both beads and snap in the 350 Bull Splicer to eliminate cracking at butt joints.
