

## **Trim-Tex® 350 Bull, 350 Cobra Bull, 350 Bull L Beads**

Proudly sold at your local [Knez Building Materials supplier](#).

### **350 Bull Corner Bead**

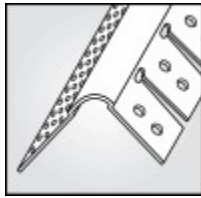

With roughly half the radius of  $\frac{3}{4}$ " bullnose, the 350 Bull Corner Bead is perfect for accenting large as well as small details: niches, layers and build-outs to outside corners, windows and balconies. Its unique design does not require setback of drywall and it installs exactly like a square corner bead.

---

### **350 Cobra Bull**

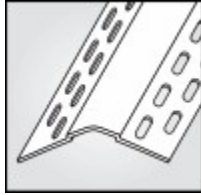

This is the first and remains the only archway bullnose bead that eliminates the need to fill notches on the exposed area of the bead. It features a novel coextruded design that allows for details as small as a 15" inside or 24" outside radius. Trim-Tex's groundbreaking, economical, no notch bullnose.

---

### **350 Bull Splayed Corner Bead**

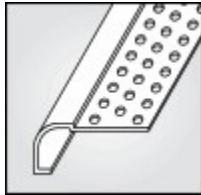

The 350 Bull Splayed Corner Bead is perfect for finishing those off angle walls. Create artistically sculpted details when used in conjunction with the 0921 Off Angle 3 Way.

---

**350 Bull L Bead & 350 Cobra Bull L Bead**

350 Bull L Bead functions similarly to the Trim-Tex J Round or Chamfer Stop. Use the 350 Cobra Bull L Bead to make artistic curved layers. This is the perfect bead for creating decorative layers or a clean, finished look around doors and windows.
