

Trim-Tex® Chamfer Beads

Proudly sold at your local [Knez Building Materials supplier](#).

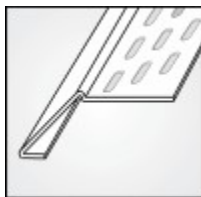

Chamfer Bead

Trim-Tex's novel Chamfer Bead gives you an exciting new corner trim option. For those unsatisfied with the appearance of both square and bullnose corners, the Chamfer Bead is likely the remedy. This unique bead provides a finish two sharp lines on every corner. Available in lengths of 8' and 10'.

Chamfer Stop

The Chamfer Stop perfectly complements the Chamfer Bead for creating striking multilayered drywall effects. In place of wood mouldings, Chamfer Stop is the ideal substitute for finishing doors and windows. Anything you can imagine can be created with the Trim-Tex Chamfer Stop. Available for either 1/2" or 5/8" drywall in a length of 10'.

Chamfer 3-Way

Use the Chamfer 3-Way for finishing corners at the intersection of 3 Chamfer Beads. Simply apply a small amount of construction adhesive on the tabs and bond the Chamfer 3 Way corner to the abutting Chamfer Beads.

Chamfer Marker

The Chamfer Marker allows you to cope 90° and 135° inside of angles easily and quickly. Simply place the Chamfer Marker over Chamfer Bead or Chamfer Stop and make a pencil mark along the marking edge. After snipping with yellow aviation snips, you produce a perfectly coped corner every time—it's that simple.
