

Trim-Tex® Expansion Joints and Reveal Beads

Proudly sold at your local [Knez Building Materials supplier](#).

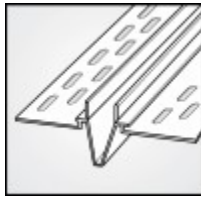

Hideaway Expansion Joint

This novel design eliminates the exposed "V" left by other joints. A soft center "W" flexes and bends with structure fluctuations in expansion and contraction. This revolutionary expansion joint provides a full 3/16" range of movement.

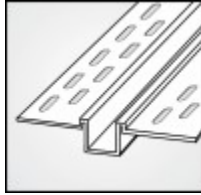

093 V Expansion Joint

A bottom V of deep rigid PVC is affixed to a flexible connection for a full 1/4" of optimally controlled movement. It comes with tearable strips for guiding taping knife and protecting center from mud, making cleanup that much easier.

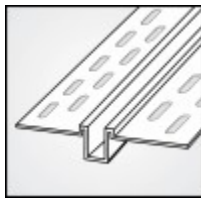

1/2" Reveal Bead

Provides an ideal reveal for any installation. It is manufactured from a rigid vinyl, approved for interior construction, and suitable for painting.

1/4" x 1/4" Reveal Bead

This is the perfect bead for adding an extra subtle detail to your walls. This newly developed reveal finishes to roughly 1/4" x 1/4" size, making it perfect for residential installations where a reveal any bigger would be too strong.
