

## Trim-Tex® J Beads

Proudly sold at your local [Knez Building Materials supplier](#).

### Standard J Bead

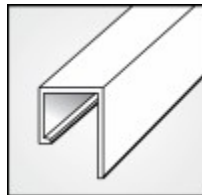

This standard J bead is made of rigid vinyl that is light in weight, permits the application of paint, and is easy to both handle and cut. The material has been approved for use in interior construction and will never rust. Designed for nail-on or slip-over application. Available in widths varying from ¼" to 1" and lengths from 8' to 12'; ask your Knez representative for help ordering the correct size for your job's needs.

---

### Shadow Line J Bead

This J bead helps you achieve a unique look by forming a shadow line along finished edge of drywall. It is constructed from rigid vinyl and is suited to be painted. Available in widths of ½" and ⅝" and lengths of 8' and 10'; ask your Knez representative for help ordering the correct size for your job's needs.

---

### Mud On J Bead

The Mud On J Bead is the perfect option for use as a moisture barrier around bathtubs and metal windows and doors. Available in widths of ½" and ⅝" and lengths of 8' and 10'; ask your Knez representative for help ordering the correct size for your job's needs.
