

Trim-Tex® Jumbo Corner Beads and Skim Plaster Corner Bead

Proudly sold at your local [Knez Building Materials supplier](#).

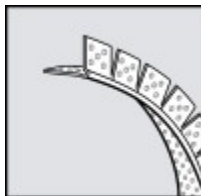

Jumbo Corner Bead

Featuring the same design as the standard corner bead, the Jumbo Corner Bead has a 1 ¾" mud leg, making it wide enough for finishing two layers of 5/8" drywall. Ideal for use in high traffic areas or anywhere that a corner with extra strength is desired. (Length: 10')

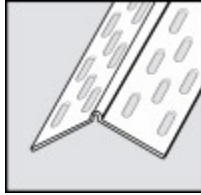

Jumbo Archway Corner Bead

This Jumbo bead is just as flexible and well-designed as the regular Jumbo Corner Bead, but with extra width. Perfect for finishing archways or other curved corners. (1 ¼" wide; 10' long.)

Skim Coat Plaster Corner Bead

Formulated for use with skim coat veneers and EIFS, the bead features a tall .100" mud bump for skin coat or L-5 finishing requirements. Enlarged openings allow more compound to penetrate, resulting in an enhanced and entire bonding of the corner to the wall. (1 ¾" wide; 10' long)
