## IMPERIAL® VENEER FINISH

PERFECT FOR AREAS WITH HEAVY TRAFFIC.

Creates durable, abrasion-resistant interior finishes.

### PRODUCT FEATURES

IMPERIAL Veneer Finish is a high-performing, strong finish plaster when used in fire-related assemblies. It is suited for use on top of IMPERIAL Gypsum Base or as a durable finish over veneer or conventional high-strength sanded basecoats.

Resulting in an abrasion-resistant, hard, and durable finish, the product requires only one application. It is perfect for heavy traffic areas subject to extra abrasion, bumping, and scuffing. The finish applies in one layer, producing a hard, abrasion-resistant surface ideal for withstanding the bumping and scuffing of high-traffic areas. It integrates best with smooth-trowel or texture finishes. It sets quickly and is usually suitable to be painted the day after application.

For an exceptionally high level of abrasion resistance and durability, apply the finish on top of IMPERIAL or DIAMOND Veneer Basecoats. It may also be suitably applied as a finish coat over job-sanded STRUCTO-BASE® Gypsum Plaster, producing an extremely hard final surface.

This product is fire rated.
